

Platform optimization

To remain successful in today's competitive market, enterprises have invested more and more in information technology (IT). But their investments have been largely suboptimal, driven by pressing business needs. As a result, much of today's IT infrastructure is inefficient and unmanageable.

The move to industry standard components in the enterprise presents an opportunity to create sustainable IT efficiency and improved service levels. We call this platform optimization.

Existing IT Environment	Platform Optimization
Multiple operating systems and databases	Industry standard technology
Too many skills required	Consolidated skill base
Increased end-of-life risk	Minimal end-of-life risk
Cross-platform service level issues	Increased service levels & maintainability
Inefficient supply chain relationships	Efficient supply chain
Costly business continuity	Streamlined risk management
Difficult to upgrade	Low risk and fast upgrades

The key to successful platform optimization is predictable and efficient application migration.

That's where MigrateTEC comes in.

With more than ten years of application migration experience, MigrateTEC is the recognized leader in C/C++ migration solutions for cross-platform and 32-bit to 64-bit migrations.

Our methodology, process and software enable more predictable, faster and less expensive application migration.

MigrateTEC Migration Model

MigrateTEC has created a three-phase engagement model to make our solutions easier to buy, since customer investment increases only with predictability and value.

Objectives:	• Complexity-effort	• Effort detail	• Execution
Benefits:	• Predictability	• Efficiency	• Cost and quality
Deliverables:	• Map	• Plan	• Successful migration

Whether a customer wants to migrate from one 32-bit platform to another or upgrade to the most advanced hardware available today, MigraTEC has the right solution.

32Direct™ Product Family

32-Bit Cross-Platform Migration Solutions

- Solaris™/AIX/HP-UX to Linux®
- Solaris/AIX/HP-UX to Linux on zSeries®
- Solaris/AIX/HP-UX to Windows®
- Solaris to AIX/HP-UX
- OS/2 to Windows/Linux
- Compiler/OS Upgrades

64Express™ Product Family

32-Bit to 64-Bit Solutions

- Linux32 to Linux64 on Intel® Itanium® 2
- Linux32 to Linux64 on AMD Opteron™
- Windows32 to Windows64 on Intel Itanium2
- Windows32 to Windows64 on AMD Opteron®
- AIX32 to AIX5L on PowerPC™
- Solaris32 to Solaris64 on Ultra SPARC™

Less Time, Lower Cost, Better Performance

Through our patented automation and process expertise, MigraTEC and our Service Partners consistently perform application migrations faster, better and at less cost.

Customer Value Creation

In addition to enabling a predictable process, MigraTEC technology saves more than 50% of the time (and cost) to complete a typical (500,000 line) migration project.

32Direct™ A Success Story

Situation A Windows-focused System Integrator needed to show a financial services firm that core business applications could be moved from Solaris to Windows predictably and efficiently.

- Key Facts**
- Pilot assessment conducted in parallel by SI and MigraTEC.
 - SI team took 6 weeks and multiple client site visits to capture, analyze and assess source code using manual methods.
 - Manual assessment's trial-and-error method did not reveal all source-code issues.
 - Two-person MigraTEC team completes same mission using MigraTEC technology in single visit to client site.

- Results**
- Assessed migration feasibility and risk with 32Direct™
 - Application "Build" and source code captured in under 6 hours (90% cycle time and cost reduction).
 - Migration assessment completed in one week.
 - Delivered planning and cost metrics for actual migration.

64Express™ A Success Story

Situation A database/connectivity software developer must complete fast-track migration in order to participate in Itanium launch marketing activities.

Mission To gain significant market advantage of being first graphical development environment migrated to 64-bit technology.

- Key Facts**
- Completion deadline not flexible for a project that is large and complex.
 - 750,000 lines of code in 1,300 files.
 - 16-bit legacy code scattered among the 32-bit code.
 - Estimated 200 worker-days to complete migration annually.

- Results**
- Outsourced significant portion of code to MigraTEC Migration Center.
 - Project completed in 90 worker days.
 - Customer achieved time-to-market goals while significantly reducing labor and expense versus manual migration.

When You Want It Done Right

When you need to migrate critical business applications from one platform to another...

Think MigraTEC:

- We have the patented methodology, processes and specialized software to complete the job faster, for less cost, at the lowest possible risk.
- We offer the only automated migration solution for both application and server consolidation.
- We enable you to predict the time and cost of migration projects before the job starts.
